Aldergrove, B.C. V4W 3R3

RE: Letter of Recommendation

Dear Richard:

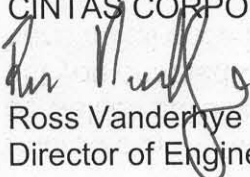

I thought I would take a moment and thank you for the outstanding building you built for Cintas Corporation in Langley, British Columbia. I have received numerous comments on the quality of construction and attention to detail. I was very impressed with Titan Construction's commitment to make the project happen. You build quality industrial buildings and have a very professional construction management team.

Prior to starting the project, I was concerned with using a new general contractor as well as building in Canada. Not only did Titan build a quality Cintas building, but you enabled Cintas to build a "standard Cintas building" in Canada. Titan handled all code issues between USA and Canadian building codes, and made the project easy to manage. There were no change orders generated and Titan took responsibility for all "gray areas." The project was completed within budget constraints. Although the project was delayed because of weather, Titan showed a sense of urgency and did everything possible to keep the project on schedule.

Very rarely do I have the pleasure of working with a contractor who has the integrity and honesty of Titan Construction. I would not hesitate to recommend Titan Construction to other builders and would use your services again on future Cintas building projects. Thanks again Richard, and I hope to work with you in the future.

Sincerely,

CINTAS CORPORATION

  
Ross Vanderhye  
Director of Engineering
