To whom it may concern,

I am very pleased to provide this letter of reference for Titan Construction. I am currently a project manager for the TDL Group Ltd, handling all new construction in British Columbia.

In March of 1999 I first worked with Titan Construction on a new Tim Hortons/Wendys in Port Coquitlam, BC. Being responsible for all new construction in BC I have had the opportunity to work with many general contractors. It was clear from the onset that Titan was a professional organization of high caliber and above many others in the industry. That project as well as many in the years since have been completed on time and to TDL's high standard's of construction.

Titan's commitment to quality work and their customer requirements are highly notable. In BC it seems that no project is straight forward or standard. Titan's flexibility, organizational and leadership skills are a big contribution and make my job much easier. Titans project managers in conjunction with the on site superintendents and there office personnel have been instrumental on numerous occasions in providing viable options to some development and design problems that arose. This has enabled us to stay on track schedule wise as well as financially. Titans follow up after a project is complete is always superb and I know that any issues that do arise are dealt with quickly and correctly.

Finally, perhaps what I appreciate the most about Titan Construction is the values the entire company adheres to and the honesty and integrity, with which they conduct their business. From the initial tender process, to construction, to dealing with problems, and completing the warranty period I have complete trust in them and find it very refreshing in today's marketplace. I look forward to working with them in the future and have no hesitation in recommending them with the highest of marks.

Sincerely,

Chris Denis
